

# EMULSIFICATED TIP FOR OCULISTIC SURGERY, PARTICULARLY FOR PHACOEMULSIFICATION OF CATARACT

5

## ABSTRACT

The invention concerns an improved tip (1) for oculistic surgery, particularly for the removal of cataract, having a proximal joint end (2) and a distal end (4), contacting the crystalline during the surgical intervention, wherein the distal end (4) contacting a corneal or sclera tissue is coated with an anti-friction treatment, based on carbon and tungsten carbide.
